DataLit Institute
June 22-26, 2020

For ME and NH high school and middle school science teachers and scientist partners interested in engaging their students in citizen science.

- Engage your students as citizen scientists by integrating well water monitoring into your curriculum and collecting water samples in your community.
- Cultivate the tools and skills necessary to teach students how to interpret, analyze, and display data.
- Learn how to effectively share data and solutions to well water contamination with your community.

Teachers are required to participate in at least one DataLit Institute at MDI Biological Laboratory before initiating classroom projects.
