High School Student Summer Research Fellowship

June 21 - August 8, 2020

MDI Biological Laboratory offers summer research fellowship opportunities for high school students with an interest in developing scientific research skills. Fellows are supervised by a faculty mentor and work alongside undergraduate fellows, graduate students, postdoctoral fellows and research assistants, thereby gaining experience and perspective on scientific research careers. They will conduct an independent research project and present their findings at our annual Summer Science Symposium. Fellows live with other high school students in an on-campus dormitory with a resident advisor and participate together in group activities outside the work day.

Students must reach out to their science teacher or guidance counselor about receiving a nomination for the program. Home-schooled students can also be nominated by a professional with knowledge of the student’s abilities. The nomination form must be submitted before the student can apply. Once the nomination has been completed, the student will receive an email with application information.

For more information, visit: https://mdibl.org/education/high-school-opportunities/hs-applications/

REQUIREMENTS

• Parental/guardian consent if under 18.
• Nomination by a teacher or school administrator.
• Must be 16+ years old by June 22, 2020; Students graduating in 2020 are eligible.
• Successful completion of Laboratory Biology, Laboratory Chemistry, and one Math course (at least Algebra 1).
• Students must commit to the entire 7-week program.
• Students from the US are eligible to apply.

NOMINATIONS DUE
Tuesday, January 7th

APPLICATIONS DUE
Tuesday, February 4th
