ABOUT THE PROGRAM

Open to undergraduates enrolled in specific Maine colleges and universities: Bates, Bowdoin, Colby, College of the Atlantic, Southern Maine Community College, UMaine Farmington, UMaine Machias, UMaine Fort Kent, UMaine Presque Isle, and UMaine Honors College.

Students spend 10 weeks at their chosen research institution.

INBRE fellows receive housing, meal plans, and stipends.

IDeA Network of Biomedical Research Excellence (INBRE) Fellowship

June 1 - August 8, 2020

The Maine IDeA Network of Biomedical Research Excellence (INBRE) is a collaborative network of Maine educational and research institutions led by the MDI Biological Laboratory. Each accepted student has the opportunity to participate in a biomedical research project, working closely with a faculty mentor in their research laboratory.

Students will have the opportunity to do cutting-edge biomedical research in state-of-the-art laboratories around the state of Maine.

Research sites include MDI Biological Laboratory, Colby College, Bates College, Bowdoin College, University of Maine, College of the Atlantic, University of New England, and Maine Medical Center Research Institute. Available mentors are listed on the Maine INBRE website.

There are also opportunities for research at various institutions in Northeast Region IDeA states including Delaware, Rhode Island, Vermont, and New Hampshire.

DEADLINE TO APPLY

Tuesday, January 28th
